# photoshop Documentation

*Release 0.15.1*

Jun 19, 2021

# CONTENTS

<b>1</b>	<b>Installation</b>	<b>3</b>
1.1	From sources . . . . .	3
<b>2</b>	<b>Examples</b>	<b>5</b>
2.1	Emboss Action . . . . .	5
2.2	Create New Document . . . . .	6
2.3	Photoshop Session . . . . .	6
2.4	Create Thumbnail . . . . .	7
2.5	Session Callback . . . . .	8
2.6	Eval Javascript . . . . .	8
2.7	Fit On Screen . . . . .	8
2.8	Session Hello World . . . . .	9
2.9	Add Start Application Event . . . . .	9
2.10	Move To End . . . . .	10
2.11	Open Psd . . . . .	10
2.12	Session Document Duplicate . . . . .	10
2.13	Replace Images . . . . .	11
2.14	Session New Document . . . . .	11
2.15	Add Metadata . . . . .	11
2.16	Apply Filters . . . . .	11
2.17	Operation Channels . . . . .	13
2.18	Compare Colors . . . . .	13
2.19	Save To Psd . . . . .	13
2.20	Add Slate . . . . .	14
2.21	Operation Layer Set . . . . .	14
2.22	Session Smart Sharpen . . . . .	15
2.23	Enable Generator . . . . .	16
2.24	Load Selection . . . . .	16
2.25	Rotate Layer . . . . .	17
2.26	Cropping . . . . .	18
2.27	Creating A Layer . . . . .	18
2.28	New Document . . . . .	18
2.29	Save As Pdf . . . . .	19
2.30	Toggle Proof Colors . . . . .	19
2.31	Copy And Paste . . . . .	20
2.32	Import Image As Layer . . . . .	21
2.33	Active Layer . . . . .	21
2.34	Fill Selection . . . . .	21
2.35	Trim . . . . .	22
2.36	Hello World . . . . .	22

2.37	Apply Crystallize Filter Action . . . . .	23
2.38	Save As Tga . . . . .	24
2.39	Color . . . . .	24
2.40	Export Layers As Png . . . . .	25
2.41	Change Color Of Background And Foreground . . . . .	25
2.42	Link Layer . . . . .	26
2.43	Smart Sharpen . . . . .	26
2.44	Selection Stroke . . . . .	27
2.45	Set Active Layer . . . . .	28
2.46	Current Tool . . . . .	29

The API for using COM (Component Object Model) objects interfaces of Photoshop.

## INSTALLATION

### 1.1 From sources

The sources for photoshop python api can be downloaded from the [Github repo](#).

You can either clone the public repository:

```
$ git clone https://github.com/loonghao/photoshop_python_api.git
```

Or download the [tarball](#):

```
$ python setup.py install
```

Or you can install via pip.

```
$ pip install photoshop_python_api
```

## EXAMPLES

## 2.1 Emboss Action

```
from photoshop import Session

with Session() as ps:
    app = ps.app
    for index, x in enumerate(range(50)):
        # Execute an existing action from action palette.
        idPly = app.charIDToTypeID("Ply ")
        desc8 = ps.ActionDescriptor()
        idnull = app.charIDToTypeID("null")
        ref3 = ps.ActionReference()
        idActn = app.charIDToTypeID("Actn")
        ref3.putName(idActn, "Sepia Toning (layer)")
        idASet = app.charIDToTypeID("ASet")
        ref3.putName(idASet, "Default Actions")
        desc8.putReference(idnull, ref3)
        app.executeAction(idPly, desc8, ps.DialogModes.DisplayNoDialogs)

        # Create solid color fill layer.
        idMk = app.charIDToTypeID("Mk ")
        desc21 = ps.ActionDescriptor()
        idNull = app.charIDToTypeID("null")
        ref12 = ps.ActionReference()
        idContentLayer1 = app.stringIDToTypeID("contentLayer")
        ref12.putClass(idContentLayer1)
        desc21.putReference(idNull, ref12)
        idUsng = app.charIDToTypeID("Usng")
        desc22 = ps.ActionDescriptor()
        idType = app.charIDToTypeID("Type")
        desc23 = ps.ActionDescriptor()
        idClr = app.charIDToTypeID("Clr ")
        desc24 = ps.ActionDescriptor()
        idRd = app.charIDToTypeID("Rd ")
        desc24.putDouble(idRd, index)
        idGrn = app.charIDToTypeID("Grn ")
        desc24.putDouble(idGrn, index)
        idBl = app.charIDToTypeID("Bl ")
        desc24.putDouble(idBl, index)
        idRGBC = app.charIDToTypeID("RGBC")
        desc23.putObject(idClr, idRGBC, desc24)
        idSolidColorLayer = app.stringIDToTypeID("solidColorLayer")
```

(continues on next page)

(continued from previous page)

```

desc22.putObject(idType, idSolidColorLayer, desc23)
idContentLayer2 = app.StringIDToTypeID("contentLayer")
desc21.putObject(idUsng, idContentLayer2, desc22)
app.executeAction(idMk, desc21, ps.DialogModes.DisplayNoDialogs)

# Select mask.
idSlct = app.charIDToTypeID("slct")
desc38 = ps.ActionDescriptor()
idNull1 = app.charIDToTypeID("null")
ref20 = ps.ActionReference()
idChnl1 = app.charIDToTypeID("Chnl")
idChnl2 = app.charIDToTypeID("Chnl")
idMsk = app.charIDToTypeID("Msk ")
ref20.putEnumerated(idChnl1, idChnl2, idMsk)
desc38.putReference(idNull1, ref20)
idMkVs = app.charIDToTypeID("MkVs")
desc38.putBoolean(idMkVs, False)
app.executeAction(idSlct, desc38, ps.DialogModes.DisplayNoDialogs)

app.activeDocument.activeLayer.invert()

```

## 2.2 Create New Document

```

"""Create a new document."""

from photoshop import Session
